VALIDATION

Version	Name	Date
1.0		

2. DOCUMENT CONTENT

3. SCRIPT DESCRIPTION

3.1 Objective

The purpose of DeletionPS is to delete the tags on a PI data archive server.
The user have to provide the server name and the list of tags to delete.
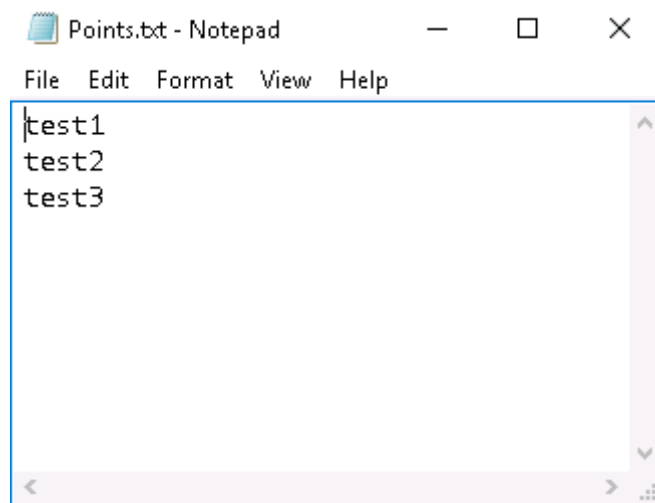

3.2 Prerequisite

- Microsoft Powershell (1.0 or later).
- PI SMT 2018 or later.

4. USER GUIDE

Copy the folder DeletionPS in your local machine/server.

4.1 Prepare the input file

Get the list of the tags you want to delete. Copy the list on the folder ".\input\Points.txt", one tag per line. Example :

4.2 Configure 01-DeletionPS.bat

Edit the file ".\script\01-DeletionPS.bat".

```
cd ..
powershell.exe -file .\DeletionPS.ps1 -piServerHost "PI-CENTER-HQ"
```
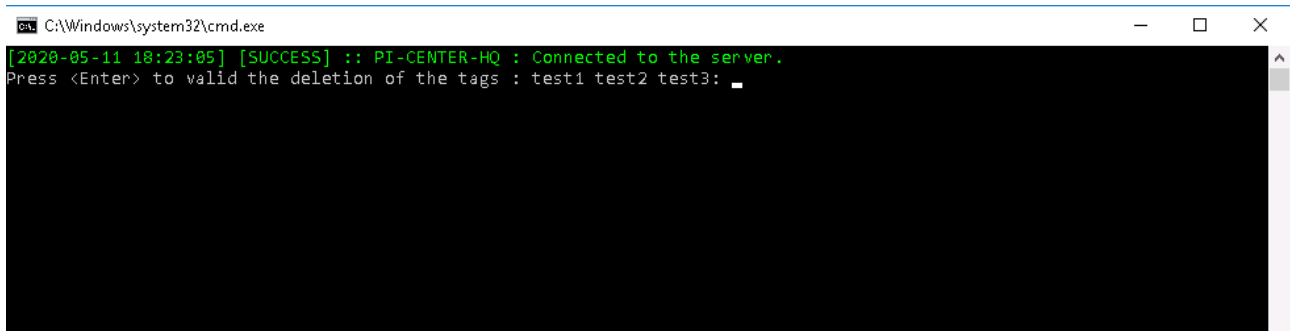

Modify the following parameters :
- **PIServerHost** : Name of the PI Server to delete tags (exemple : PI-CENTER-HQ)

Then save the modifications and close the file.

4.3 Run DeletionPS

Run the script 01-DeletionPS.bat (do not run it as administrator).

You should have the following window opened. Presse <Enter> to valid the deletion.

Then let the application delete all archived event and tags structure. If some tags does not exist, the application will mention it (example below with tag <test2> which does not exist) :

Press <Enter> to quit the application.
